Bergara Premier Canyon Sniper Grey Cerakote Bolt Action Rifle – 375 H&H Magnum – If you prefer the classic fit and feel of a hunting rifle stock without the extra weight, the Premier Series Canyon rifle, built on a 100% carbon fiber AG Composites stock may be exactly what you are looking for. The No. 4 fluted barrel with the 5/8-24in threaded Omni brake allows reduced felt recoil when shooting the heavy-hitting caliber options. The M5 floor plate gives you the ability to customize with either the detachable magazine or a hinged floor plate. The Canyon rifle is the perfect balance of a lightweight and portable hunting rig!

Think of Bergara’s Premier Series as custom quality, but with standardized features for greater efficiencies in parts production and assembly – providing near custom performance at prices that are affordable to serious shooters. Bergara’s Premium stainless steel barrels receive a proprietary honing process at our barrel-making facility in Bergara, Spain. Then, at the Bergara USA factory, the barrel receives a Sniper Grey Cerakote finish and is coupled with Bergara’s proprietary Bergara PREMIER action, featuring a nonrotating gas shield, coned bolt nose, and sliding plate extractor.

This action is designed as a two-lug system that features a separate floating bolt head to ensure contact with the lug abutments in the action. It also features a cone-shaped bolt nose for smooth feeding of the cartridge, and a spring-loaded sliding plate extractor located in the front of the lower locking lug. The one-piece bolt body is stainless steel with a pad at the rear to accept the threaded-in bolt handle. The bolt head, the non-rotating gas shield, and the bolt shroud are fully Nitrided for extreme durability, as well as its self-lubricating properties.

The two-position safety is part of the trigger assembly, which in the Canyon rifle is a TriggerTech Frictionless Release Technology trigger. One great feature of this combination allows the bolt handle not to lock in the closed position, which in turn allows the rifle to be unloaded while in the safe position.

The stock on the Canyon is AG Composite 100% Carbon Fiber. It supports a fully free-floated barrel.

## Specifications

CAPACITY	3+1
BARREL LENGTH	22in
FINISH	Sniper Grey Cerakote
STOCK	AG Composite 100% carbon fiber
WEIGHT	6.5lbs
ACTION	Bolt Action
BARREL TYPE	Fluted
CARTRIDGE	375 H&H Magnum
COLOR	Camo
HAND	Right
OVERALL LENGTH	44in
PRODUCT LINE	Premier Canyon
STOCK MATERIAL	Carbon Fiber
THREADED	Yes
TWIST	1:12in
TYPE	Centerfire
