### MRC 2022 RECEIVER

The all-new MRC 2022 receiver is a continuation of the original MRC 1999 receiver which is conceived in part from the pre-64 Model 70. Our controlled feed receiver is one of few on the market that is 100% fully machined from a 416 stainless steel blank. This provides the ultimate in precision and reliability.

### WALNUT STOCK

Set in a Monte Carlo-style walnut stock, this 6.5 Creedmoor is built for any hunt – and show room.

### PRECISION MANUFACTURING

Montana Rifle Co. is owned and manufactured by Grace Engineering Corp., a 3rd generation family business known for its precision manufacturing in the firearm industry, as well as a leading archery brand – G5 Outdoors.

### AMERICAN MADE

All Montana Rifle Company firearms are designed and manufactured in Memphis, Michigan.

### INTEGRATED M-LOK RAIL

Patent-pending licensed M-Lok interface with traditional sling stud & QD socket. Made from high-thickness anodized aircraft aluminum, this rail is perfect for easy integration of M-Lok style bipods, tripods and other attachments.

### CONTROLLED FEED ACTION

This Mauser-style claw extractor is made from tool steel. The extractor provides consistent round ejection and ensures a smooth feed for the cartridge.

### 3-POSITION SAFETY

The 3-position safety blocks the firing pin and lets you open the bolt with the safety on. In first position, both the firing pin and the bolt are locked. Second position, locks the firing pin, but not the bolt. Third position, with the safety fully forward, the rifle is ready to fire.

### ULTRA-ACCURATE BARRELS

Montana Rifle Co. has always been known for its hand-lapped button pulled ultra-accurate barrels – that's where it all started. All of our barrels are built in-house using the same equipment and methods as the original Montana Rifle Co.

### ADJUSTABLE TRIGGER

Inspired by the pre-64 Model 70 trigger geometry, our trigger is simple to adjust and operate. It is precision wire EDM cut from tool steel, and is factory set at 3.5 lbs, with the capability to adjust down to 2 lbs.

### GUARANTEED 1/2-MOA ACCURACY

All Model 2022 rifles are guaranteed to shoot a 3-shot group inside 1/2 MOA from a cold barrel using premium ammunition.

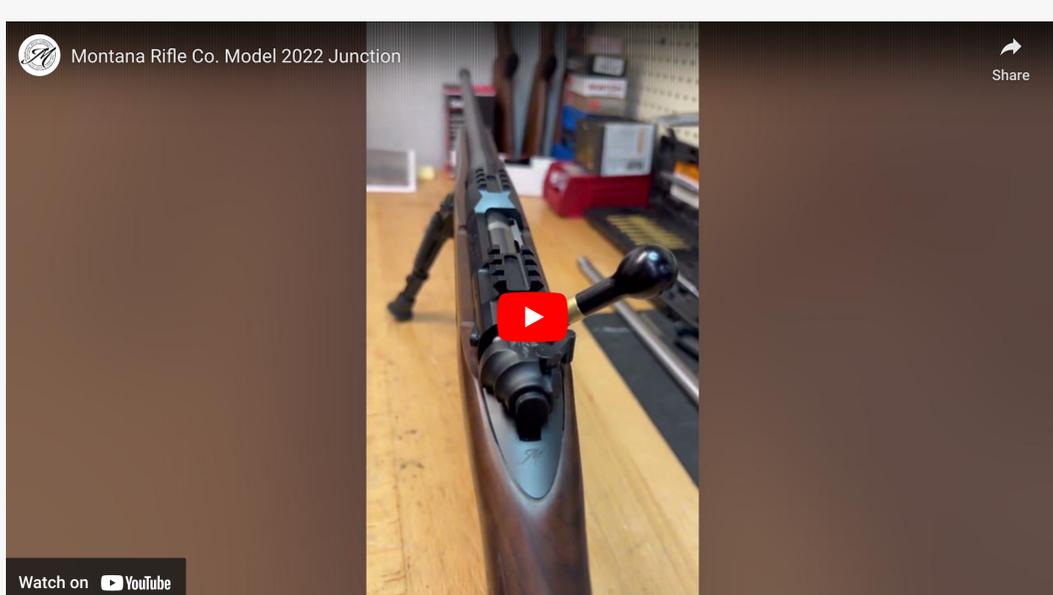

### LEFTIES

While we do not currently have left-handed models available, we will be offering this in the future for all Montana rifles.
