

LIGHTWEIGHT ALLOY SCOPE MOUNTS

LIGHTWEIGHT ALLOY SCOPE MOUNTS

The one-piece construction of the Talley Lightweight Alloy Scope Mount is unique. The rigid design has no joint between the scope and the rifle. The Talley Lightweight unitized design eliminates the possibility of an "out of alignment" interface or "loose connection" between the ring and base of traditional two-piece designs. Ultimately this provides more strength and durability than rival steel rings and bases but doing it with a lighter overall weight. By extruding the 6000 series alloy known for its durability and then precision CNC machining the mount to its final design we can provide you with the strongest, lightest mount system on the market. With over 40 years of setting the industry standard for superior quality, Talley Scope Mounts have become known for precise tolerances. American craftsmanship, state-of-the-art CNC automation and stringent quality controls have vaulted Talley products to the top of the scope ring industry. Talley Scope Ring systems provide repeatability, flexibility, strength, and durability for the most discriminating of sportsmen. Simply said, Talley Lightweight Alloy Scope Mounts are the best.
