An exceptional, lightweight liner that's been proven on the longest trails – use it as your sock system's baselayer, or on its own if you want to ride light. COOLMAX® EcoMade and nylon fibres are combined for exceptional moisture management, breathability, durability and softness. The patented five-toe design minimises skin-on-skin friction that leads to blisters and lets your foot work naturally for better alignment and feel underfoot. Designed as a liner, this ultra-thin crew also works well on its own for warm weather hikes and runs.

Features & Benefits

200 Needle Count

The more needles, the better. 200 Needle socks are lightweight, sturdy and durable.

Blister Prevention

With each toe protected, skin-on-skin friction is completely eliminated protecting your foot from blisters & just as important, hotspots.

Moisture Management

Each toe is wrapped in sweat-wicking material so your foot will be drier and therefore more comfortable than in traditional socks.

Total Foot Utilisation

When your toes are separated, properly aligned, and splayed it distributes your weight evenly which allows your entire foot to be engaged in any athletic activity.

Fibre Content

Fibre content:
75% CoolMax EcoMade® 21% Nylon, 4% Lycra®
