Product Information

Redding dies are made of the finest alloy steels obtainable and machined on Hardinge Super- Precision lathes capable of holding the tightest tolerances in the industry.   To maintain tolerances and guarantee that your dies will last a lifetime, all Redding dies are heat treated in atmospherically controlled furnaces. Finally, your dies are hand polished for smooth, flawless functioning, go through final inspection, and are ultrasonically cleaned and packaged. The die box is a handy cartridge loading block and storage package. Inside is a spare decapping pin, hex wrench, and even a place for your shellholder (sold separately). All Redding dies use the industry standard 7/8-14 threaded bodies. Die sets for straight wall cases contain three dies: a full length resizing die, an expander die with neck expanding plug, and seating die with built in crimp ring and the proper seating plug. Die sets for bottleneck cases contain two dies: a full length resizing die and seating die with built in crimp ring.

⭐⭐⭐⭐⭐ 375/444 Marlin Redding Dies
By James N. on Sep 22, 2023

These are for a TC Contender rifle in.375 JDJ which is a .444 Marlin necked down to accept a ,375 caliber bullet. The I always think of Redding as the premium quality available in reloading dies, and don't mind spending the extra bucks. After cleaning the dies, I used them to form the .375 JDJ from .444 Marlin cases. Piece of cake.
I only discovered Grafs a few years ago. I've found them to regularly have hard to find items and reliably ship quickly with very reasonable shipping charges..

⭐⭐⭐⭐⭐ 375 jdj dies
By Robert V. on Jan 03, 2020

Have not used them yet shipping was very fast and the dies I'm sure are excellent
