

Method 12

For African Buffalo and Brindled Gnu or Wildebeest

- Rank on the spread (A–B).
1. Establish the outer limits of the horns using two right-angled forms. Measure the greatest spread in a straight line between the perpendiculars, at right angles to the axis of the horns (A–B).
 2. Measure the boss of each horn at the greatest width with calipers (C).
 3. Measure the spread, tip to tip (D–E).

[In the future we will look to rank the entries using the sum of the spread and the bosses of each horn.]

Outside spread (A–B)		
Width of boss (C)	Right	Left
Tip to Tip (D–E)		

*To Be Filled Out by Measurer:

Species _____ Date Measured ____/____/____ (DD/MM/YYYY)

*Measurer’s Information: (Please print if handwritten.)

First _____ Last _____ Country _____
