BUNDLE WITH ACCESSORIES

The RS.2 Ultralight Rifle scope was designed for the all-purpose hunter and features a 2-10x zoom range to cover most eastern and western hunting situations. The RS.2 is our recommended scope for those who require precision, but don't need the added features of a long-range scope, thus making it perfect for small game, eastern whitetail, as well as western big game, ultralight mountain rifle setups. Coming in at only 12 oz, it is one of the lightest all-purpose scopes in the market.

Just like all rifle scopes in the RS Series, the RS.2 features crystal clear ED glass for tack-sharp clarity, a silky focus mechanism, precision-milled adjustments, solid click detents, and durable anodizing to resist heavy use.

The Maven RS Series represents our elite line of rifle scopes, designed to fit your specific needs, delivered for a fraction of the cost to comparable rifle scopes and stacks up with the most celebrated and expensive scopes in the world. Our modern sportsman inspired designs paired with the best available materials and state of the art technology create an uncompromising optic that meets the demands of the modern hunter.

Includes neoprene cover. Custom turrets are **NOT** available on the RS.2.
