Sliding tang safety provides instant security, visibility and accessibility.

Robust, sturdy, sculptured receiver forms a rigid support for barrel, stock and sliding breech block.

Integral scope mounts, machined directly on the solid steel quarter rib, provide a stable mounting surface for included scope rings.

Strong, simple, compact falling-block breech mechanism with artillery-style breechblock and under-lever is ideally suited for today's powerful cartridges.

Ejector mechanism provides maximum leverage at the point where the ejector engages the cartridge case and can be adjusted to provide extraction only.

Cold hammer-forged barrel results in ultra-precise rifling that provides exceptional accuracy and longevity.

Also Includes: sporting style buttpad; sling swivel studs.

Features listed above are available on all standard models, but may not appear on Distributor Exclusive models. See individual spec sheets for model specific features.
