Description

New in 2018, the **Swarovski Z8i** 0.75-6x20 riflescope delivers a wide field-of-view for when it matters most. The solid 8x zoom allows you to never miss out on the action. The CLICKONE features lets you know when you have reached 1x magnification and are about to enter 0.75x magification. Its 4A-IF reticle was specifically developed for driven hunting. The functional accessories are perfectly adapted to the riflescope so that it is even easier to use while additionally offering optimum protection.

Swarovski Z8i riflescopes offer the latest in user flexibility with their large 8x zoom range and the latest in features. These innovations include:

- Slim 30mm main tube with impressive 8x zoom
- Parallax adjustment knob with catch at 100m mark allows swift and reliable parallax adjustments, even in low-light situations (No parallax adjustment on 1-6x or 1-8x models)
- SWAROLIGHT illumination with compact illumination controls, 64 levels of intensity, memory function, and auto-switch-off battery conservation. The automatic switch features a tilt sensor which detects whether the rifle is in a shooting position and turns the illumination off if the scope is not, saving battery and extending service life
- Optional BTF (Ballistic Turret Flex) allows for 3 methods of elevation correction, easy windage adjustment, and tool-less installation
- Extremely high 93% light transmission

Swarovski Z8i has been named the 2017 "Optic of the Year" by [Sporting Classics!](#)
