DESCRIPTION REVIEWS (1)

Gokey has brought back an old classic with the lightest 8” upland boot that we have ever offered. Weighing in at just a pound and a half each, The Gokey Super Light Upland Boot is constructed from a durable but lightweight Olive Green or Chocolate Brown leather that is formulated specifically for the boot. The construction, combined with an innovative, lightweight, self-cleaning sole makes these some of the lightest weight upland boots on the market reducing foot and lower leg fatigue on all-day hunts while still providing support and protection. The Gokey Super Light Upland Boot feature three pairs of lower eyelets combined with three pairs of brass speed hooks plus a top eyelet and a full-length glove leather tongue for the ultimate in adjustability and comfort. Boot leather may have slight color variation from the image.
