## Description

Tick and Chigger Gaiters, Pair

These gaiters even keep debris from getting in your boots and your laces from untying by catching on brush and vines. Heavy-duty, elastic material stretches allowing you to pull the gaiters on over your boots and pants, then shrinks back for a tight, secure fit. One pair.

Surprisingly, there aren't many good options out there for tick gaiters that aren't ridiculously expensive. I searched for quite a while before finding these to replace a camo pair from a different manufacturer that wore out and are no longer made. These are the only ones of this type (one piece, no velcro, etc) that I found. Overall, they work as expected and provide protection from ticks getting up your pant legs. They are a bit tight for my liking, but better than too loose I suppose. As others have noted, they do fray with use and I find myself cutting off long threads periodically, but it is more cosmetic than anything so far, I haven't had a pair fail by tearing or falling apart yet.

These worked well for me. They are holding up well after one season. Together with treated pants, I didn't get ticks on me.

These are great, much better than the others I have tried. These are a bit tighter to get on but they also protect better for the same reason.
